

## Steven Van de Staak - New media expert

### My ideal situation

In the past, I've enjoyed working within a big corporation. Within the company I felt very comfortable as the new media expert within the communications or IT department.

### Overview

Currently I'm finishing the Interactive Media course at the Hogeschool van Amsterdam (HBO - Bachelor of design) Expected date to finish this is end of November 2009.

### Webdesign/content management, photography (web)video and 3D modeling.

I prefer to do web design work within a content management system or while leading a project. Photography, 3D modeling and video work are all appreciated both working on them or leading a group (external company) of artists.

At ING Wholesale Banking I primarily worked on the intranet. I did various tasks like creating pages, adding news, creating (visual) content, redesign pages, testing and support towards the business with the CMS.

### Work experience at companies

*Mei-2003— Juli-2003*                      *Albert Heijn*                      *Almere, NL*
